#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

### **Restriction/Election Requirement**

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- I. Claim 1, drawn to a method of compiling a function gene profile of a donor organism, classified in class 702, subclass 19.
- II. Claim 2, drawn to a method of identifying the sequence of an antigen of a pathogen, classified in class 435, subclass 6.
- III. Claims 3-33, drawn to a method of identifying the sequence of an antigen of a cancer cell, classified in class 435, subclass 6.

The inventions are distinct, each from the other because:

Inventions of Groups I, II, and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (M.P.E.P. § 806.04, M.P.E.P. § 808.01). In the instant case the different inventions are directed to methods having different functions, different effects, and different modes of operation. The function(s)/mode of operation of Group I is to compile a functional gene profile of the host or of the donor organism. The function(s)/mode of operation of Group II is to identify the sequence of the antigen of the pathogen. The function(s)/mode of operation of Group III is to identify the sequence of the antigen of the cancer cell. Thus, Groups I, II, and III have different functions, different effects, and different modes of operation.

Because these inventions are distinct for the reasons given above, have acquired a separate status in the art because of their recognized divergent subject matter and the search for

Art Unit: 1631

required for each Group is not required for the other Group(s), restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 C.F.R. § 1.143).
